About AIAC

Apex International Accreditation Center – AIAC is an independent accreditation body committed to strengthening quality infrastructure through internationally aligned accreditation, professional training and capacity-building services.

AIAC works with conformity assessment bodies, regulators, industry and technical experts across national, regional, and international markets to promote competence, consistency and confidence in conformity assessment activities.

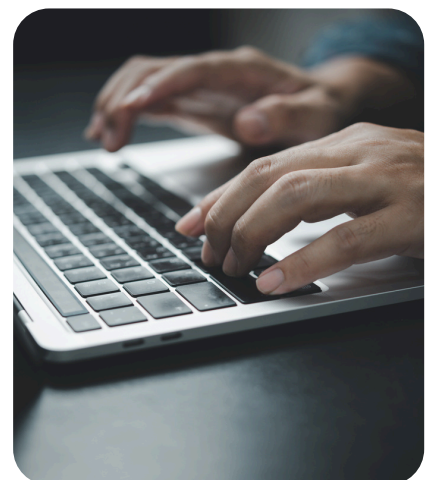

Our Mission

To promote competence, impartiality and confidence in conformity assessment by delivering internationally aligned accreditation services, professional training, and capacity-building for organizations, regulators, accreditation bodies, and other stakeholders at national, regional and international levels.

Quality infrastructure is built through competence, integrity and confidence. AIAC is committed to strengthening this foundation by developing competent professionals and supporting credible conformity assessment.

Our Vision

To become a trusted regional and international partner recognized for advancing accreditation, professional competence and quality infrastructure through technical excellence, integrity and continual improvement.

About This Catalogue

This catalogue presents AIAC's Training and Capacity-Building Programme, offering practical training across accreditation, conformity assessment, laboratory quality, inspection, certification, auditing and related technical disciplines. Programmes are designed in accordance with internationally recognized standards and accreditation best practices and are available to organizations and professionals at national, regional and international levels.

Why Choose AIAC Training

AIAC training programmes are designed to strengthen professional competence through practical learning, technical discussions and application of internationally recognized accreditation principles. Delivered by experienced accreditation professionals, our programmes combine technical expertise with practical implementation to support effective application of accreditation and conformity assessment requirements.

✓ Internationally Aligned

Training programmes developed in accordance with internationally recognized standards, accreditation requirements, and global best practices.

✓ Accreditation Experts & Professionals

Programmes delivered by experienced accreditation experts, assessors, peer evaluators and industry professionals with extensive practical experience.

✓ Practical Case Studies

Interactive learning using case studies, practical exercises, and technical discussions that support effective implementation within organizations.

✓ Competency-Based Learning

Our programmes emphasize practical competence rather than theory alone, equipping participants with the knowledge and skills needed to confidently apply accreditation and conformity assessment requirements.

Who Should Attend

AIAC programmes are intended for organizations and professionals involved in accreditation, conformity assessment, quality infrastructure, regulatory oversight, and technical services.

Our programmes are suitable for

Accreditation Bodies

Testing & Calibration Laboratories

Medical Laboratories

Inspection Bodies

Certification Bodies

Proficiency Testing Providers

Regulatory Agencies

Government Authorities

Industry Associations

Universities & Research Institutions

Technical Professionals and Quality Managers

Training Programme Annual Schedule – 2026-2027

AIAC offers a range of professional training programmes covering accreditation, conformity assessment, auditing, and related technical disciplines. Programmes are developed in accordance with internationally recognized standards and accreditation best practices and are delivered by experienced technical professionals.

The following schedule presents AIAC's planned and completed public training programmes for 2026. Additional programmes may be introduced during the year based on international developments, emerging standards, and stakeholder interest.

#	Training Programme	Related Service	Mode	Duration	Training Dates	Target Audience	Status
1	ISO/IEC 17020:2012 Training	Inspection Bodies	Remote	2 Days	02-03 March 2026	Inspection Body Staff & Auditors	Completed

Training Categories & Subject Areas

AIAC training programmes cover a broad range of accreditation and conformity assessment disciplines. Programmes are intended to support the development of technical competence, consistent implementation of international standards, and continual professional development across laboratories, inspection bodies, certification bodies, accreditation bodies, regulators and other interested organizations.

Inspection Bodies

Standard: ISO/IEC 17020:2026

Testing & Calibration Laboratories

Standard: ISO/IEC 17025:2017

Medical Laboratories

Standard: ISO 15189:2022

Product Certification

Standard: ISO/IEC 17065:2012

Halal Certification

Standard: OIC/SMIIC 2 | GSO 2055-2

Personnel Certification

Standard: ISO/IEC 17024:2012

Management System Certification

Standard: ISO/IEC 17021-1:2015

Validation & Verification

Standard: ISO/IEC 17029:2019

Audit & Report Writing

Standard: ISO 19011:2026

Training programmes are offered through scheduled public sessions and in-house delivery. Programmes may be conducted remotely or on-site and are available to organizations and professionals at national, regional, and international levels.

Quality, GMP & Food Safety Training

Beyond accreditation standards, AIAC offers practical training in good manufacturing and laboratory practices, quality assurance and quality control, HACCP and food safety. These programmes help manufacturers, food businesses, laboratories and quality professionals strengthen compliance, product quality and consumer safety.

Good Manufacturing Practice

Reference: GMP | WHO GMP | cGMP

Good Laboratory Practice

Reference: GLP | OECD Principles of GLP

Laboratory Safety & Biosafety

Standard: ISO 15190:2020 | ISO 35001:2019

QA & QC Practices

Focus: Quality Assurance & Quality Control

HACCP

Reference: Codex HACCP Principles

Method Validation & Verification

Focus: Testing & Calibration Methods

Food Safety Management

Standard: ISO 22000:2018 | FSSC 22000

Quality Management Systems

Standard: ISO 9001:2026

Environmental & OHS Management

Standard: ISO 14001:2026 | ISO 45001:2018

Root Cause Analysis & CAPA

Focus: Investigation & Corrective Action

Data Integrity

Reference: ALCOA+ Principles

Risk Management

Standards: ISO 31000:2018

Programmes can be adapted to your organization's processes and delivered as public sessions or in-house training, remotely or on-site, for organizations and professionals at national, regional and international levels.

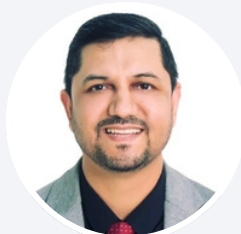

Meet Our Trainers

AIAC programmes are delivered by experienced accreditation experts, assessors and industry professionals.
